

Quality Policy

Addfield Projects is committed to providing the highest quality service by listening to both our customers and employees and continually reviewing our processes in line with our business needs and strategic direction, thus maximising the efficiency of our Quality Management System (QMS).

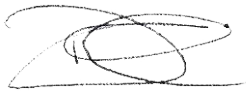

The principal elements of our policy are: -

- To develop and maintain a Quality Management System satisfying the requirements of BS EN ISO 9001: 2015 which forms the framework for achieving continual improvement, complete customer satisfaction and full realisation of all company objectives.
- To focus on the requirements of customers, establishing levels of communication capable of fully determining their needs and expectations.
- To identify scope for improvement in every aspect of the company's activities, devising and implementing effective solutions throughout.
- Commit to undertake regular internal audits to continually improve our quality management system and processes.
- Ensuring that the QMS is regularly reviewed at the management review meetings for suitability.

Implementation of the Quality Policy is the responsibility of every member of staff throughout the organisation, supported by our processes and training structure.

The QHSE Manager is responsible for monitoring the Quality Management System and reports to the Company Directors on the system's implementation, status and effectiveness.
